

End-to-end technology enabled solution ensures streamlined system upgrade and data migration to new software platform

Client

- Leading company in the hospitality industry in Asia
- Part of a USD 6.7 billion group, one of India's leading industrial houses with interests in various sectors such as Automotive, Auto Components, Farm Equipment, Trade & Financial Services, Infrastructure and Information Technology

Business Need

- Upgrade the Microsoft Dynamics Axapta 3.0 product to Microsoft Dynamics AX 2009 to ensure continuous improvement in overall productivity and growth

Approach

- Hassle free and upgrade friendly code deployment to the new product Microsoft Dynamics AX 2009
- Seamless data migration from MS SQL server 2000 to RDBMS MS SQL server 2008

Results

- Greater employee productivity
- Optimized business processes
- Speedy preparation of financial statements
- Higher integration capabilities

Comprehensive solution ensuring error free migration from legacy systems to new Microsoft platform

The client had migrated from a legacy ERP system and implemented Microsoft Business Solution Axapta 3.0, integrating it with several enterprise systems such as CRM, HRMS, Central Reservation system, web applications, Ecommerce Portals, Mobile systems and home grown applications through COM interoperability. To ensure sustained system productivity, the client decided to upgrade the existing Microsoft Dynamics Axapta 3.0 product to Microsoft Dynamics AX 2009.

Ascenders Technologies implemented the upgrade in an error free manner, resolving code conflicts in the relevant business process areas and application functionality. Entire legacy data was migrated to the new system without any software issues or compliance errors.

Technologies used:

- Dynamics AX 2009
- MS SQL Server 2005
- .NET Web services & Business Connectors
- Application Integration Framework
- Talisma CRM

Customer Testimonials

"Post upgrade, Ascenders Technologies also helped us deliver the critical functionality of income recognition which is very unique to our business model. Till now the solution is satisfactorily utilized by our business users without any hassles. I would like to thank Ascenders Technologies for their continuous support." – **Chief Information Officer**

"Ascenders Technologies' dedication and commitment has been good and they amazed us with their time bound upgrade of Axapta 3.0 to Dynamics 5.0. This upgrade is considered complex given the number of customizations done and the number of partners it changed hands." – **Chief Information Officer**

Robust software upgrade with seamless data migration for increased productivity and system integration

Ascenders Technologies facilitated a smooth upgrade from the existing Microsoft Dynamics Axapta 3.0 product to Microsoft Dynamics AX 2009 without causing any disruption to routine work processes. A structured data migration to the new platform helped the client prepare financial statements in a quick and error free manner and optimize their core business processes. The end result of the upgrade was an increase in employee productivity and enhanced system integration capabilities.
